BRAMMER recognises outstanding innovation at its glittering awards ceremony

Hosted by motoring journalist and TV presenter Quentin Willson, BRAMMER presented outstanding and real examples of how BRAMMER and its suppliers use their combined expertise and knowledge to deliver significant cost savings and production efficiency improvements to customers in the MRO marketplace.

Attended by 300 guests at London’s magnificent Science Museum, the Awards were presented, jointly, to BRAMMER’s customers and suppliers in recognition of their innovative solutions.

The UKs leading distributor of industrial maintenance, repair and overhaul (MRO) products presented awards to:

- Gates – for providing a solution using its energy efficient Gates PolyChain™ belt drive for BRAMMER customer Alfred McAlpine
- Monks & Crane – a BRAMMER customer which in turn is the integrated supply provider running UK stores for leading brewer Coors
- NSK – for providing a solution using its maintenance-free bearings for BRAMMER customer Nestle

Motoring journalist and TV presenter Quentin Willson hosted the event

Managing director Ian Ritchie said: "We are committed to help make British industry more profitable and cost effective for consistent and sustainable long-term success. The Awards provide outstanding and real examples of how BRAMMER and its suppliers use our combined expertise and knowledge to deliver significant cost savings to customers".

The event also raised some £25,000 through donations and an auction for the Make-A-Wish Foundation®, which makes dreams come true for children and young people aged three to 17 fighting life-threatening illnesses.
